

PEAK STAGE DIFFERENCES

alt4-A

Percent of years with max stage at least
1.00 ft higher than NSM462

06 Jun 2006 19:52:10 Tuesday

Note: Map values do not distinguish between groundwater and surface water and should only be used as a general indicator of subregions that may have a change in peak stages. Those subregions require more detailed investigation and analysis before site-specific inferences about changes in flooding risk can be made.
